POWERPAK

POWERPAK

**POWERPAK.**

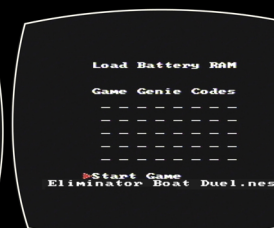

*Now you're really  
playing with power!*

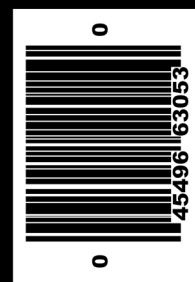

Here's the ultimate cartridge for any Nintendo Entertainment System gamer! The PowerPak offers you a gaming experience like no other. Thanks to the built-in Compact Flash card reader you're able to load any NES game you'd like to play directly from the CF cartridge.

The PowerPak supports most games already and the future brings even better game support. As well as unlimited game play the PowerPak also has a battery backup function built in to save in great classics such as the Legend of Zelda.

Also note that the PowerPak is region free, so it'll work on any NES deck throughout the world.
